## Nordic Brown pre-oxidised copper

Nordic Brown™ products are pre-oxidised at Aurubis' factory to give straightaway the same oxidised brown surface that otherwise develops over time in the environment. The thickness of the oxide layer determines the colour: both Nordic Brown™Light and the darker Nordic Brown™ versions are available.

Nordic Brown™ products are useful to minimise hand and other construction marks which can occur for a short time after installation with 'bright' standard copper. But light and dark versions can also be combined  perhaps with other finishes such as Nordic Standard  to create various visual effects.

Nordic Brown™ is available in sheets or coils.

- > Thickness range: 0.5 – 1.5 mm
- > Maximum width: 1000 mm.

It can also be provided in a wide range of different forms and used in various systems.

House in Seeheim, Germany; Architects: Fritsch und Schlüter Architekten.
